

NLL = 2.89266107657359317

signal_sigma = 4.40467 +/- 2.34576

signal_mean = 74.59 +/- 2.84203

exp_amp_1 = 847.086 +/- 417.351

exp_len_1 = 0.0516016 +/- 0.00780214

A1 = 26.9975 +/- 19.9735

exp_amp_2 = 381.668 +/- 308.797

exp_len_2 = 0.0304121 +/- 0.0105817

A2 = 23.2768 +/- 23.4247

It seem like a reasonable fit to both peaks, at least from visual inspection (neither looks like the width or mean is inappropriate).
